**CUSTOMER NEWSLETTER 2024 WINTER EDITION Volume XXII, Issue III**

**GAS EMERGENCIES IMMEDIATELY CALL**  
**(716) 937-9484 AVAILABLE 24/7**

All emergency calls received after regular business hours will be answered by our automated system and returned promptly. A message must be left in order for our crew to be dispatched.

*In the event of a **FIRE EMERGENCY**, first escape and then notify the fire department!*

All public services involved in an emergency shall notify Reserve Gas as soon as possible. Annually, all public services are provided with an Emergency Notification List, along with pertinent information to be used in the event of an emergency. For your well-being and others practice fire-safe behaviors when smoking, cooking and heating. Maintain smoke alarms, develop and practice a fire escape plan and if possible, install home fire sprinklers.

# Carbon Monoxide

Often called “the Silent Killer,” carbon monoxide (CO) is a highly poisonous gas that is colorless, odorless, tasteless, and virtually impossible to recognize without a detector installed. Although carbon monoxide is a normal by-product of fuel burning, malfunctioning appliances or improper ventilation can cause CO to reach dangerous levels in your home.

Protect yourself and your family from carbon monoxide poisoning by taking these precautions:

- Install a carbon monoxide alarm. We recommend that the alarm be marked with the “UL” certification (UL 2034) and installed near bedrooms.
- Contact your local municipality to get CO detector requirements for your area.
- Have your chimney and fuel-burning appliances checked regularly (annually at a minimum) by a qualified professional.
- Be sure all space heaters and woodstoves are in good condition and used in strict compliance with the manufacturer’s instructions.
- Always turn off your car when it’s parked. A vehicle left running inside a garage is the most common cause of carbon monoxide accidents.

## Suspect a CO Leak?

If you suspect a carbon monoxide leak in your home, go outside immediately and report it to 911. Indicators of high levels of carbon monoxide in the home may include:

- Extremely stuffy, stale air.
- Water condensation dripping on the inside of windows.
- Residents exhibiting the symptoms of carbon monoxide exposure: flu-like symptoms such as dizziness, headaches, sleepiness, nausea, fluttering of the heart, and loss of muscle control.

**Safe Digging Is No Accident:**

**Always Call 811 Before You Dig!**

# WINTER family FUN CHECKLIST

- MAKE A GINGERBREAD HOUSE
